

# One Point solution for Surface preparation and Corrosion Prevention

**CORROSION PREVENTION  
SOLUTIONS AND SERVICES**

## Company Profile

Blastclean was found in August-2011 and commenced operations with a team of 22 employees. Today we are a team of 500 working with more than 18 esteemed clients line L & T, TATA, GE, Alstom, OIL, KVUL, BSL etc. at different parts of India. It is our experience and dedication that our clients have come to know and expect of us to render our services. We have our senior staff with NACE certified coating Inspectors certification and provide NACE certified Coating Inspection Services and consultancy services.

Blastclean's objective is to excel in all aspects of the Corrosion Control industry including, high quality workmanship, latest technology and zero harm regarding the health and safety of all employees, clients, contractors, suppliers and the community as well as the environment in which we work. We pride ourselves in achieving superior customer service through reliable services within time frames and with cost effective methods to compete in ever demanding market.

Within a short period in business, we have established excellent relationships with our client's, suppliers, inspection authorities as well as OEM's.

## Our Services

1. Operation and maintenance of shot blasting equipment's.
2. Shot/grit blasting & painting contacting work.
3. Periodic maintenance of shot blasting equipment's
4. Protective Coating Application
5. Surface Cleaning
6. Consultancy services for shot blasting equipment, quality, coatings, painting etc.
7. Mobile Blast Booth Facilities
8. Erection & commissioning of shot blasting equipment's
9. Revamping/ refurbishing of shot blasting equipment's
10. Shot blasting accessories and Spares
11. Shot & grits supply.

## Projects

Our team of dedicated and knowledgeable staff are highly experienced with specialised shot blasting, protective coatings such as solvent & water borne epoxies, polyurethane, zinc rich coatings and a vast range of coatings for both internal and external application. BCP team have vast experience and successfully completed many big projects India and internationally.

### Key areas of excellence

- Excellence in skilled manpower mobilisation
- Excellence in Project Management
- Superior HSE Performance
- Project target achievement
- Minimal Environmental Impact
- Continuous Improvement of our Quality Management System

### Industries of interest

- Petrochemical Projects
- Power projects
- Automobile industry
- Ship building and Marine
- Hydro power and wind energy
- Railways
- Mining
- Commercial Structures

BCP have well experienced team which can suggest what type of equipment and process can give best results at most cost effective method. The blasting technology is by hurling shots & grits at high velocity looks pretty simple. But in the world of shot blasting machines, simple does not mean maintenance free. The essence of these machines, no matter how best they are designed, is that clean core parts comes at the price of dramatic wear and tear of media, as well as machine components that comes in contact with abrasives.
